-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dubois et al. (Dubois).

Dubois discloses a storing container, the container is inherently capable of storing and transporting laundry and is inherently capable of performing as a laundry basket. The basket includes at least one receptacle (area enclosed by sidewall 3 and reinforcing wall 5 as shown in Fig. 4 and 6 or the area enclosed by rounded grip 25 as shown in Fig. 5) formed into at least one of said side walls for receiving and retaining a laundry product tube. The tube could be small in comparison to the areas shown in Fig. 4 and 6 and the rounded grip of Fig. 5.

Re claims 2, there is more than one area defined in the regions adjacent to the upper rim as defined by the long ribs 8 in the end walls and in the side walls.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubois in view of Bavaveas.

Dubois discloses the invention except for the clear plastic tube, cap and stop ring and the laundry product. Bavaveas teaches the addition of a container within the side wall of a larger

Art Unit: 3727

container. It would have been obvious to add a container to the side wall of a larger container to provide a container which is used in conjunction with the container the convenience of being attached and supported by the sidewall of the larger container. For example, to add a concentrate to the larger container. Official notice is taken of clear plastic tubes with threaded caps and stop rings. It would have been obvious to make the container clear plastic to view the contents therethrough, to make the container a tube as motivated by the conforming the shape of the smaller container to the space into which it will fit, to have a cap and stop ring to close the contents and prevent over tightening of the cap. The storing of laundry product would have been obvious as motivated by the need to store and transport laundry products together in a convenient manner.
